- Translation
- Contact page
- Authors page

Navigation

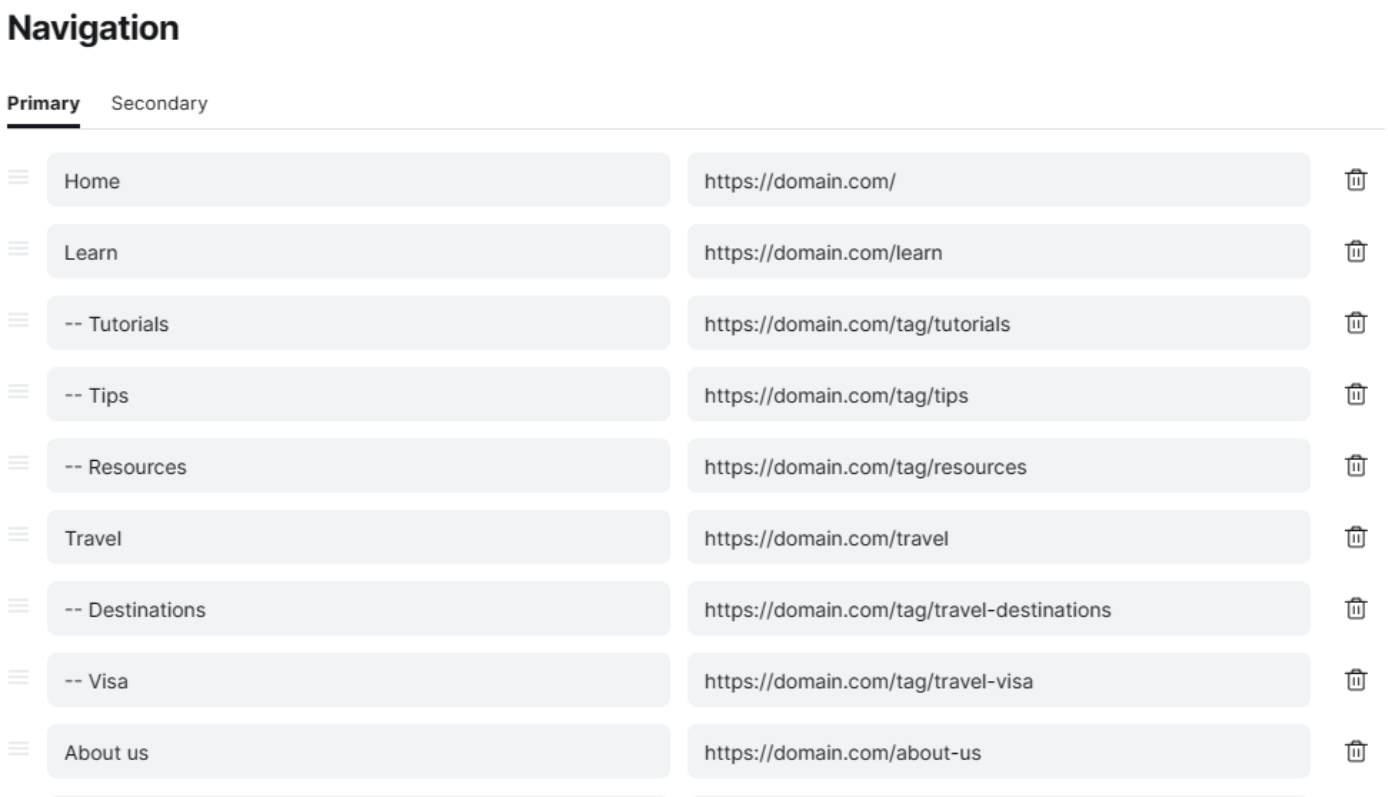
Primary Navigation

The "Primary Navigation" option lets you customize the main menu that appears in your website's header.

To customize Primary navigation, you need to:

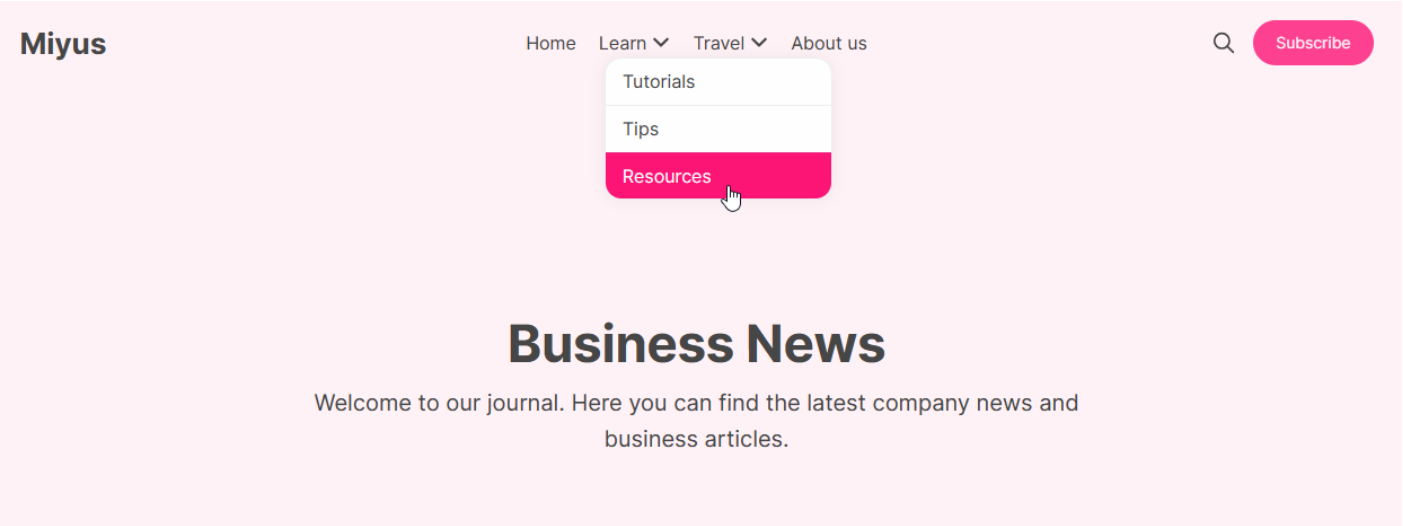
1. Navigate to '**Navigation**' settings in the Ghost Admin.
2. Locate the "**Primary**" tab on the left-hand side of the interface.
3. Add the menu items for your main pages.
4. To apply the modifications you've made, click the "**OK**" button.

By default, this theme supports a drop-down menu in the header navigation that can display a second level of items.



You can easily create a sub-menu under any main menu item in the header navigation of this theme. This feature is built-in and does not require any additional configuration.

Preview:



Secondary Navigation

The secondary navigation option lets you customize the footer navigation menu.

To customize Primary navigation, you need to:

1. Navigate to '**Navigation**' settings in the Ghost Admin.
2. Locate the "**Secondary**" tab on the left-hand side of the interface.
3. Add the menu items for your main pages.
4. To apply the modifications you've made, click the "**OK**" button.

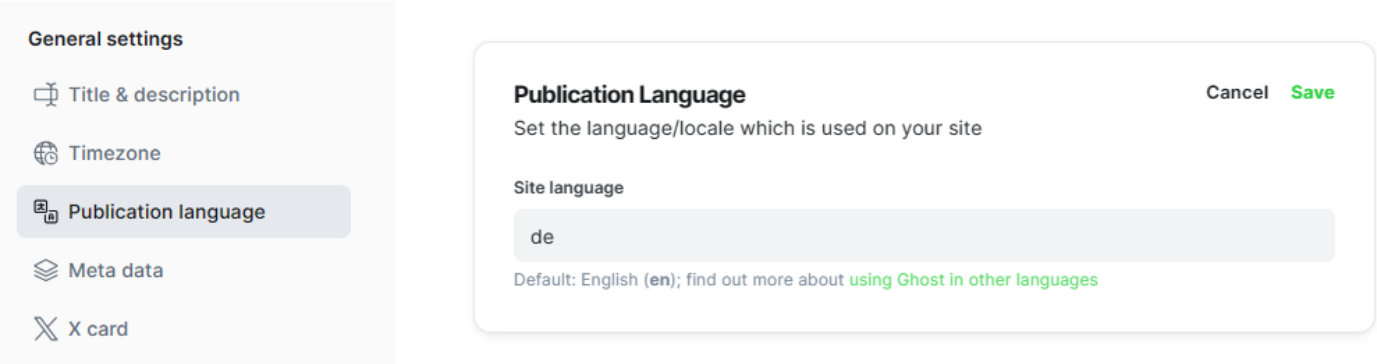
Translation

Theme Translation

The theme is fully compatible with the native translation option in Ghost CMS. This means that text in a theme is translated based on the language set in Ghost Admin.



The theme is currently available in following languages:

- `en` - English (Default)
- `de` - German

> We are happy to offer free translation services for any language that is not listed above.
>
> Please **reach out to us** if you need our assistance with your language preference.

Portal Translation

Portal is an independent feature that is not part of the theme. However, you can change the language of your membership pages to match your publication.

To turn on Portal translation option:

1. Navigate to '**Labs**' settings in the Ghost Admin.
2. Switch the "**Portal translation**" option under the "**Beta features**" tab on.

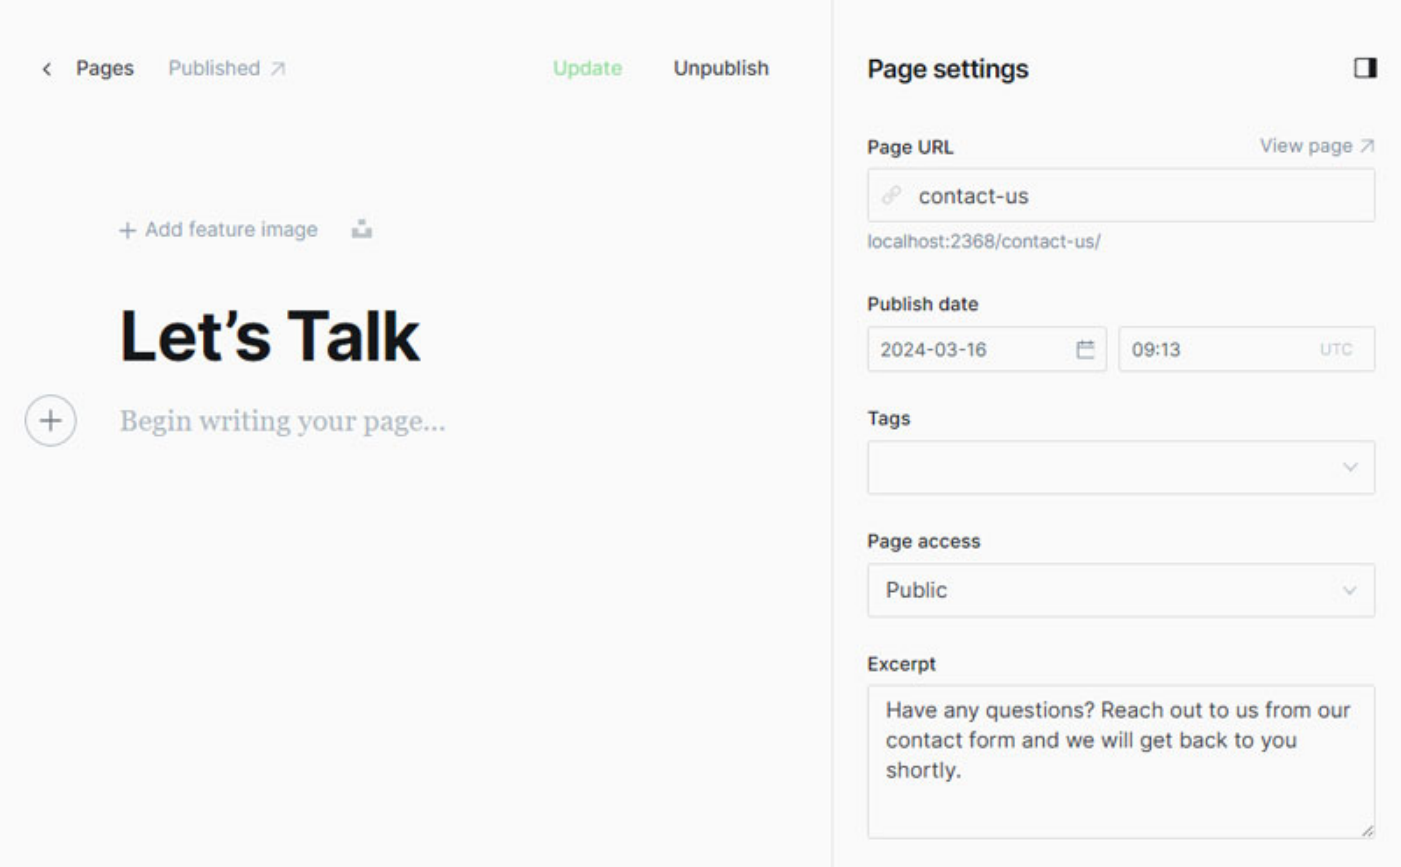
> You can find more information about this option in our **comprehensive guide**.

Contact page

If you want your readers to contact you directly, you can add a contact page to your website. This theme includes built-in [Formspree.io integration] for easy setup.

Add the contact page

1. Create a new page, add a page title, add an excerpt, and open the '**Page settings**' panel using the icon in the top right of the screen.
2. At the bottom of the panel you'll see a dropdown menu titled '**Template**'.
3. Use the dropdown menu to select the '**Contact**' template, close the panel.
4. Finally, click '**Publish**'.



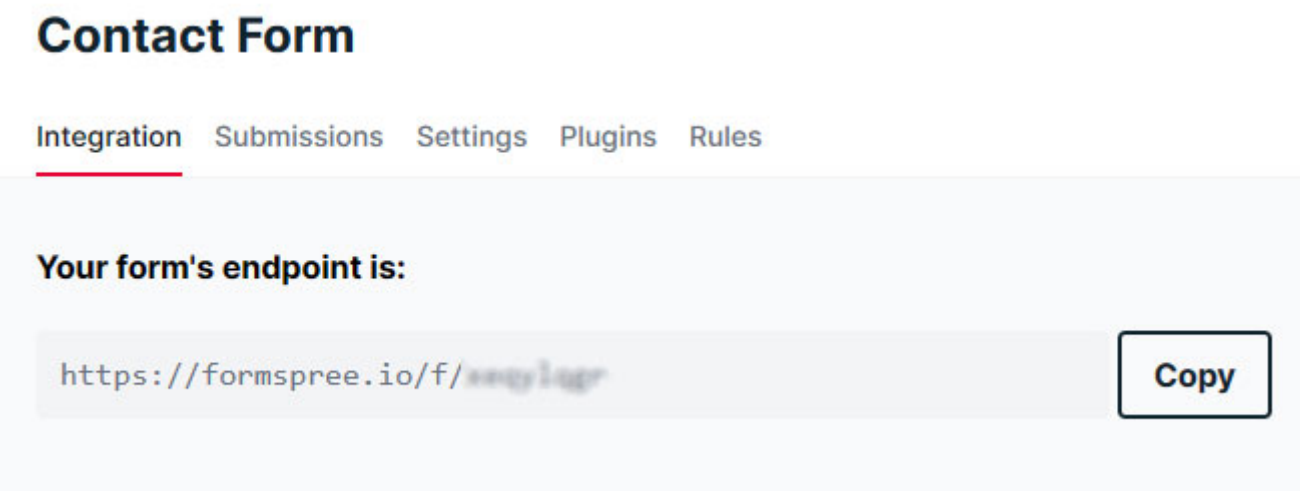
Easy: Standard Contact Form

To simplify setup, we've pre-built a contact form into the contact page, featuring fields for Name, Email Address, and Message. You can enable this quickly and easily, even without any coding

knowledge.

Create a form on Formspree.io

1. Go to formspree.io and sign up for an account.
2. Once signed in, create a new form and obtain the endpoint URL for the form.



Add your Formspree endpoint

1. Navigate to '**Design & branding**' settings in the Ghost Admin.
2. Locate the "**Site wide**" tab on the right-hand side of the interface.
3. Navigate to the field labeled "**Contact form endpoint**" and toggle on or off the setting.
4. Paste your Formspree endpoint. e.g: `https://formspree.io/f/xeqylqgk`
5. To apply the modifications you've made, click the "**Save**" button.

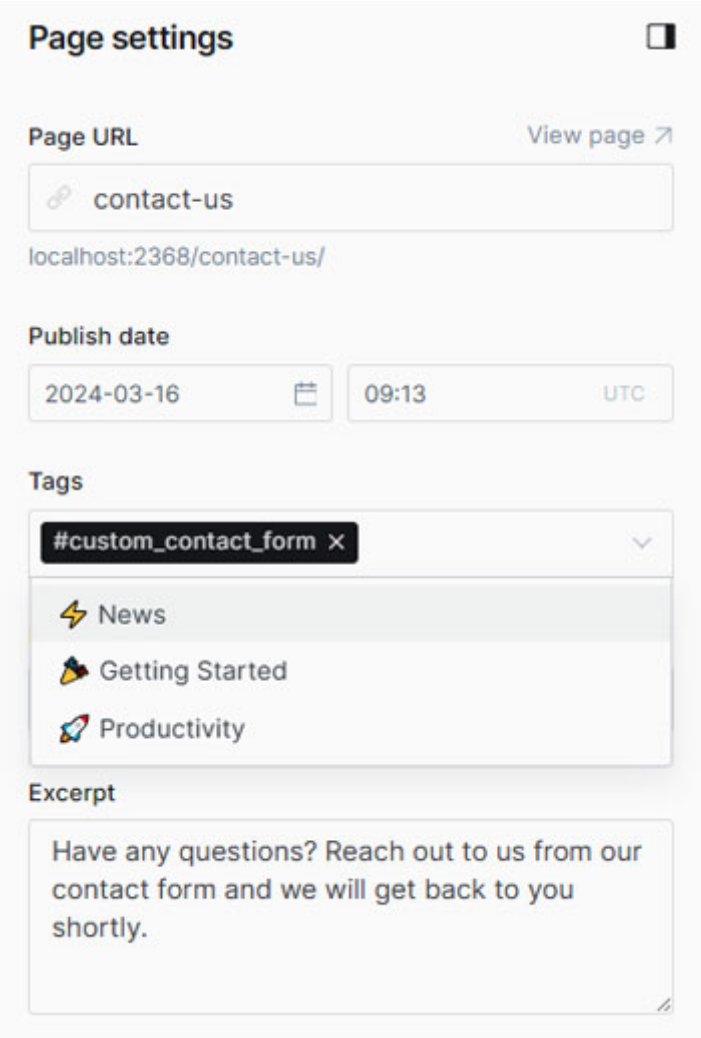
Advanced: Custom Contact Form

If you prefer to use a custom contact form instead of the one included with the theme, you can do so without editing the theme files.

> **Important:** This step is not required if you have set up the standard contact form.

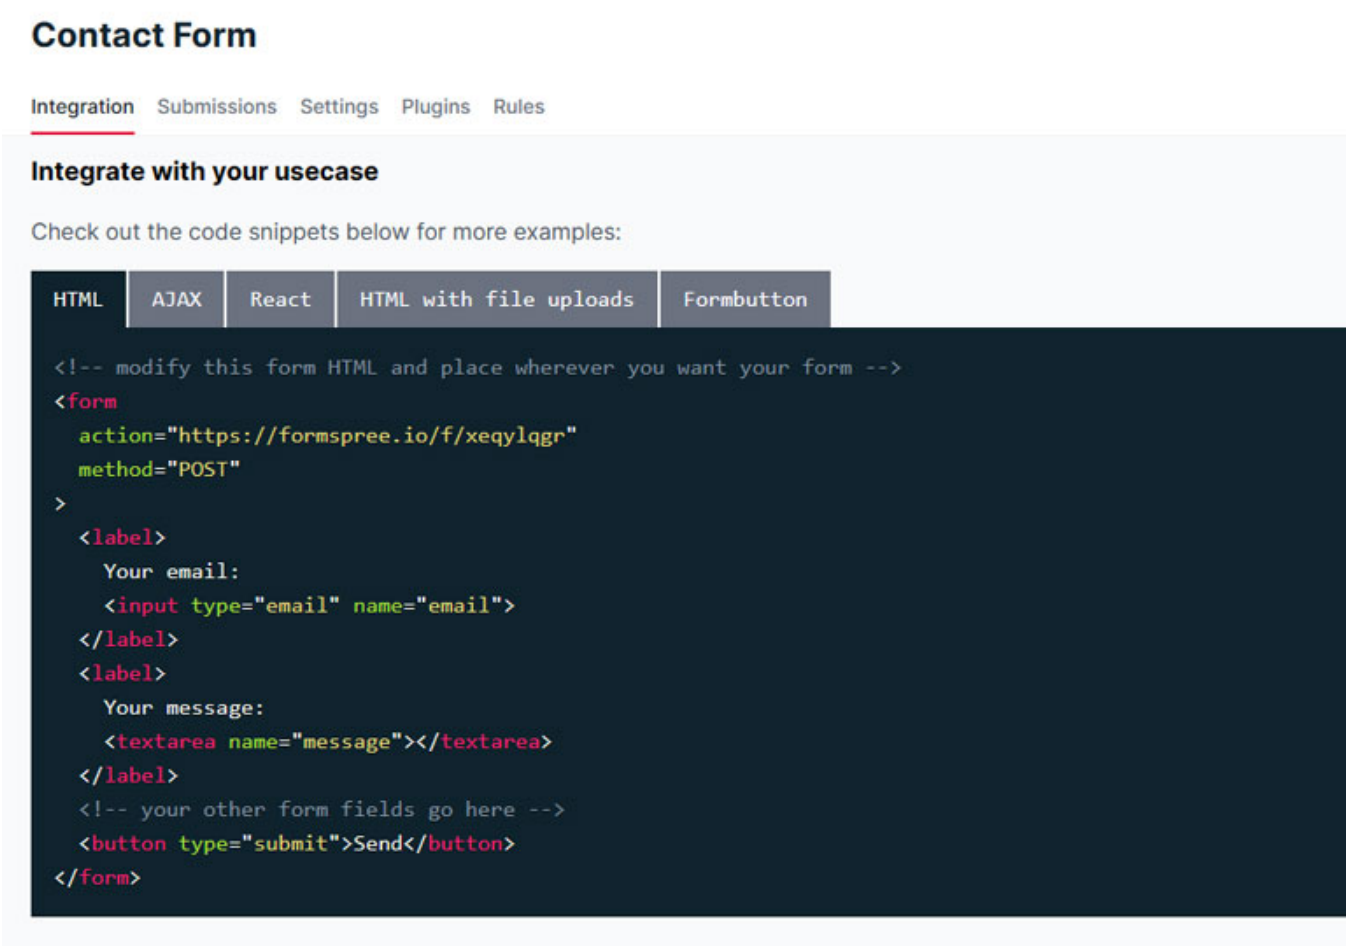
Enable the custom contact form

1. Navigate to the contact page you have created
2. Open the '**Page settings**' panel using the icon in the top right of the screen.
3. In the tags field, add the internal tag `#custom_contact_form`

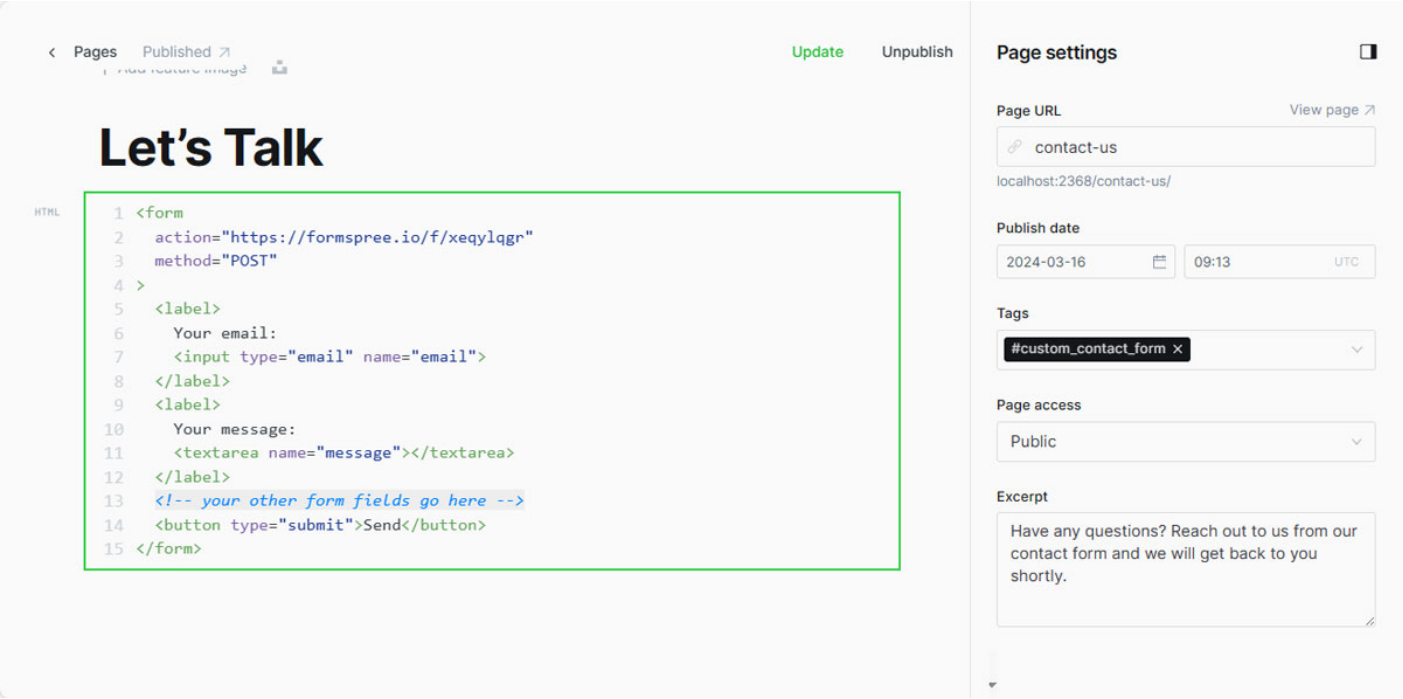


Add the custom contact form

1. Go to your Formspree account and copy the form content from the "**HTML**" section.



2. Navigate back to the Ghost dashboard and open the Contact page.
3. Create an HTML card and paste the copied HTML code from Formspree.
4. Customize the form with your custom fields.
5. To apply the modifications you've made, click the "**Update**" button.



Example Custom Form Code

```
<form action="https://formspree.io/f/xeqylqgr" method="POST">
  <label>
    Your email:
    <input type="email" name="email">
  </label>
  <label>
    Department:
    <select name="department">
      <option disabled>Select a department</option>
      <option value="Sales">Sales</option>
      <option value="Billing">Billing</option>
      <option value="Customer Support">Customer Support</option>
    </select>
  </label>
  <label>
    Your message:
    <textarea name="message"></textarea>
  </label>
  <button type="submit">Send</button>
</form>
```

> As long as you adhere to the format described above, the form submission will be processed through an AJAX request by default, preventing redirection to formspree.io after submission.

Authors page

The Miyus theme includes a predefined Authors page template, which features a comprehensive list of your blog's authors.

Add the authors page

1. Create a new page
   - Add a page title
   - Feature image (optional)
2. Open the '**Page settings**' panel using the icon in the top right of the screen.
   - Add an excerpt (optional)
3. At the bottom of the panel, you'll see a dropdown menu titled '**Template**'.
4. Use the dropdown menu to select the '**Authors**' template, close the panel.
5. Finally, click '**Publish**'.
